

# Fastmark M9XPd

Easy Implementation and Easy to Use  
for All-Around Thermal Printing

## PAL®: The AMT Datasouth Difference

Implementation is made easy with our plug and play capability - saving the IT team time and effort. In addition to popular emulations, our proprietary PAL® programming language resides in the smart printer allowing us to load an app that will accept your data stream and convert, format and print to fit your organization's requirements, including both linear and 2D barcodes. You can unplug any existing printer and replace it with the Fastmark® M9XPd. And, ongoing service and support, including future changes to the PAL® app, if needed, are available for the life of the printer.

- Easy to use touchscreen interface
- Print speeds up to 12 ips
- Highest quality barcodes
- 203 and 300 dpi models available
- Our powerful and versatile “PAL”
- Equipped with popular emulations
